Form 12 – Watershed Improvement Plan	25

Form 1 – Team Members

Stormwater Program Coordinator (SPC)			
Name and Title		Stuart McGowan, Public Works Supervisor/Stormwater Coordinator	
Phone	609-494-6100	Email	bldpw@barnegatlight.org
Individual(s) Responsible for Major Development Project Stormwater Management Review			
Name and Title		Frank J. Little, Jr., P.E., P.P., C.M.E. – Township Engineer	
Phone	732-244-1090	Email	flittle@owenlittle.com
Name and Title			
		Email	
Other Municipal Stormwater Team Members			
Name and Title		Brenda Kuhn, RMC Municipal Clerk	
Phone	609-494-9196	Email	Brenda.Kuhn@Barnegatlight.org
Name and Title		Jeffrey Washburn, Zoning/Code Enforcement Officer	
Phone		Email	
Name and Title		Kathy J. Guerrero - Recycling Coordinator	
Phone	609-978-0913	Email	
Shared/Contracted Service Providers			
Provider Name	Service Provided	Term of Service	
Ocean County Road Department	Vacuum/ Jet Truck for conveyance pipe cleaning	Annual-As needed	

Form 3 – Public Announcements
Part IV.B. and C.

1. Provide the link to the dedicated stormwater webpage for your municipality.
<p style="text-align: center;">www.barnegatlight.org</p> <p>A dedicated stormwater webpage is in progress. A link will be provided once it has been established.</p>
2. List the name and title of person(s) responsible for stormwater webpage postings/updates.
<p>Stuart McGowan is responsible for providing updates to the webpage.</p>
3. List the newspapers, social media outlets, websites, direct mailings (Email or postal), and other communication approaches typically used to inform/educate the public on stormwater program information and related events/activities.
<p>All education and outreach events are posted on the Municipal Website (https://www.barnegatlight.org) and may be available at the</p> <p>Municipal Building 10 East 7th Street Barnegat Light, NJ 08008</p>

Form 4 – Post-Construction Stormwater Management in New Development and Redevelopment

Part IV.E.

<p>1. How does the municipality define “major development”? If it is different from the definition in N.J.A.C. 7:8, explain the difference.</p>
<p>“Major development” means an individual “development,” as well as multiple developments that individually or collectively result in:</p> <ol style="list-style-type: none">1. The disturbance of one or more acres of land since February 2, 2004;2. The creation of one-quarter acre or more of “regulated impervious surface” since February 2, 2004;3. The creation of one-quarter acre or more of “regulated motor vehicle surface” since March 2, 2021 {or the effective date of this ordinance, whichever is earlier}; or4. A combination of 2 and 3 above that totals an area of one-quarter acre or more. The same surface shall not be counted twice when determining if the combination area equals one-quarter acre or more. <p>Major development includes all developments that are part of a common plan of development or sale (for example, phased residential development) that collectively or individually meet any one or more of items 1, 2, 3, or 4 above. Projects undertaken by any government agency that otherwise meet the definition of “major development” but which do not require approval under the Municipal Land Use Law, N.J.S.A. 40:55D-1 et seq., are also considered “major development.”</p>
<p>2. Is the municipality’s stormwater control ordinance (SCO) the same as or more stringent than NJDEP’s model SCO? If more stringent, explain the difference.</p>
<p>The municipalities stormwater control ordinance is the same as the NJDEP’s model SCO.</p>
<p>3. Describe the process for reviewing major development project applications for compliance with the SCO and Residential Site Improvement Standards (RSIS).</p>
<p>Applications for Major Development are submitted to the local Land Use Board for review and approval. This review includes confirmation by the Board’s professionals that all projects comply with the Municipal Stormwater Control Ordinance as well as the Residential Site Improvement Standards.</p>

<p>4. Does your municipality have a mitigation plan included in your Municipal Stormwater Management Plan and Stormwater Control Ordinance? Indicate the location of records of all variances granted.</p>
<p>Yes</p> <p>Approved Plans and Major Development Summary Sheets are located at the Planning/Zoning Board office which is located in the Municipal Building.</p> <p>Municipal Building 10 East 7th Street Barnegat Light, NJ 08008</p>
<p>5. Indicate the dates of each iteration of the township's Stormwater Control Ordinance, starting with the initial adoption and including revisions.</p>
<p>August 16, 2006 February 10, 2021 September 11, 2024</p>
<p>6. Indicate the dates of each iteration of the township's Municipal Stormwater Management Plan, starting with the initial adoption and including revisions.</p>
<p>March 2005 Revised January 12, 2021(adopted September 7, 2021)</p>

Form 5 – Ordinances

Part IV.F.1.

Ordinance	Date Adopted	Was the DEP model adopted without change? If not, explain how the municipality's is more stringent.	Entity Responsible for Enforcement	Fees & Fines
1. Pet Waste	2005 Chapter 57 57-19	Yes	Police Dept., Code Enforcement, Sanitation Inspector	\$___
2. Wildlife Feeding	2005 Chapter 57 Sect. 57-20	Yes	Police Dept., Code Enforcement, Sanitation Inspector	\$___
3. Litter Control	Amended 2005 Chapter 114	Yes	Police Dept., Code Enforcement, Sanitation Inspector	\$___
4. Improper Disposal of Waste	2005 Chapter 114 Sect. 114-3	Yes	Police Dept., Code Enforcement, Sanitation Inspector	\$___
5. Yard Waste	2010 Chapter 164	Yes	Police Dept., Code Enforcement, Sanitation Inspector	\$___
6. Private Storm Drain Inlet Retrofitting	2010 Chapter 167 Article II	Yes	Engineer, Township Land Use Board	\$___
7. Illicit Connections	2005 Chapter 167 Article IV Sect. 153-40	Yes	Police Dept., Code Enforcement, Sanitation Inspector	\$___
8. Privately-Owned Salt Storage	2024 Chapter 114 Section 114-11	Yes	Police Dept., Code Enforcement, Sanitation Inspector	\$___
9. Tree Removal- Replacement	2024 Chapter 66	Yes	Police Dept., Code Enforcement, Sanitation Inspector	\$___

List any additional stormwater-related ordinances the municipality has adopted that address issues beyond the scope of the MS4 permit. Include adoption date, entity responsible for enforcement, and related fees and fines.

None

Indicate the location of records associated with ordinances and related violations and enforcement actions below.

All records are kept with the Borough's Public Works Department.

Form 6 – Street Sweeping

Part IV.F.2.a.i. and ii.

1. Provide a written description and/or attach a map outlining the sweeping schedule for the following:

- Segments of municipal roads with storm drain inlets that discharge to surface water (required at least 3 times each year)
- Segments of municipal roads that do not have storm drain inlets but do discharge to surface water (required at least 1 time each year)

Note: Only asphalt and concrete roads need to be swept. Roads that do not have storm drain inlets and do not discharge to surface water do not need to be swept.

Street Sweeping will be performed on Barnegat Light municipal roads in accordance with MS4 permit section IV.5.b.i. with implementation to begin 01/01/2026, as follows.

All roads with storm drain inlets that discharge to surface water are required to be swept at least three (3) times a year.

All roads without storm drain inlets which discharge to surface water are required to be swept at least one (1) time a year.

Barnegat Light does not currently own a street sweeper. A shared service agreement will be planned with a neighboring municipality or a public contract for street sweeping services will be procured.

All County jurisdictional roads are swept by the Ocean County Road Department.

2. Indicate if sweeping work is outsourced and if so, describe the arrangement.

No work is being outsourced at this time.

Form 7 – MS4 Infrastructure

Part IV.F.2-4. and Part IV.G.2-3.

1. Municipal Storm Drain Inlets

- a. Describe how you ensure that municipal inlets without permanent wording cast into the design have been properly labelled.
- b. Describe how you ensure that municipal and private storm drain inlets have been retrofitted.
- c. Describe how you ensure that newly installed storm drain inlets include corresponding catch basins or other BMPs to collect solids.
- d. Describe when and how you conduct inspections of storm drain inlets and the criteria used to determine when they need to be cleaned.

a. All labels are inspected during the annual inspection/cleaning of the catch and inlets and replaced as needed.

b. Municipally owned storm drain inlet are replaced or retrofitted to comply with the design standards in attachment C of the Tier A permit when a road is resurfaced and/or when the inlet is in direct contact with the reconstruction or alteration of facilities.

“Private Storm Drain Inlet Retrofitting” ordinance Chapter 167, Article II requires storm drain inlets on private property to be retrofitted or replaced to meet the design standard as specified in the ordinance when the associated roadway is repaved, repaired, resurfaced, reconstructed or altered. Additionally, when private developments are submitted to the Planning Board/Zoning Board for approval. All existing privately owned inlets are required to be retrofitted.

c. The Borough Engineer reviews all Major Development projects to determine if the project is in compliance with the Municipal Stormwater Control Ordinance-Chapter 167, Article 1. The Borough Engineer attends a NJDEP-Stormwater Management Design Review Course once every five years in accordance with Tier A permit section IV.B.5.e

d. All storm drain inlets owned and operated by Barnegat Light Borough are inspected, cleaned and maintained, annually and/or as frequently as necessary to eliminate recurring problems to restore proper function.

2. Municipal Catch Basins

- a. Describe when and how you conduct inspections of catch basins.
- b. Describe the criteria used to determine when catch basins need to be cleaned.

- a. All catch basins owned and operated by Barnegat Light Borough are inspected, cleaned and maintained, annually and/or as frequently as necessary to eliminate recurring problems to restore proper function.
- b. All catch basins and inlets are inspected annually, and corrective measures are performed by the DPW Dept. Tide valves are installed to reduce tidal flooding on roadways.

3. Municipal Conveyance System

Describe when and how inspections of MS4 conveyance systems are conducted, and the criteria used to determine when they need to be cleaned. Include a description of the equipment and techniques used.

Municipal Conveyance systems are inspected annually during the inspection of storm drain inlets and during outfall inspections. The conveyance system is also inspected as a result of public notification. Conveyance pipe is cleaned where debris build-up is visible and/or restricting storm water from flowing downstream causing runoff to back-up into the upstream inlet and/or onto the surface. A vacuum / jet truck is used to jet clean the conveyance pipe pulling the debris build-up back to the inlet and/or storm manhole where it is vacuumed and hauled away for disposal.

4. Municipal Outfall Inspections – Stream Scouring

Describe the program in place to detect, investigate, and control localized stream scouring from stormwater outfalls. Include a description of the equipment and techniques used.

No outfalls meet the stream scouring requirement in the Borough of Barnegat Light.

5. Municipal Outfall Inspections – Illicit Discharge Detection and Elimination

Describe the program in place for conducting visual dry weather inspections of municipally owned or operated outfalls. Include a description of the equipment and techniques used. Record cases of illicit discharges using the DEP’s Illicit Connection Inspection Report Form from the Department’s main stormwater webpage.

Note that illicit Connection Inspection Report Forms shall be included in the SPPP and submitted to DEP with the annual report. Visual dry weather inspection for illicit connections is conducted annually and records are kept at the Department of Public Works. If a dry weather flow is observed, additional physical information would be collected, and an investigation would be conducted. An Illicit Connection Inspection Report Form would also

be completed to assist with the determination of the dry weather flow source. Improper Disposal of Waste Chapter 114-3 establishes methods for controlling discharges into the introduction of pollutants into the Township MS4 stormwater system

6. Other Municipal Infrastructure

List the types of MS4 infrastructure in your town that require inspection but are not noted above in items 1-5. Describe when and how you conduct inspections of this infrastructure and the criteria used to determine when they need to be maintained and/or cleaned.

There are no other types of MS4 Infrastructure in Barnegat Light

7. Stormwater Facilities Not Owned or Operated by the Municipality

Describe your program for ensuring adequate long-term cleaning, operation, and maintenance of stormwater facilities not owned or operated by the municipality. This should include your plan for ensuring annual inspections are being done on these private properties and describe how you record the locations and logs associated with private infrastructure.

The Borough's Code Enforcement Officer maintains a list of stormwater facilities not owned by Barnegat Light Borough. These facilities are inspected, and deficiencies brought to the attention of the owner/operator. Follow-up inspections are conducted to ensure compliance.

8. Infrastructure Records

Indicate the location of records related to stormwater infrastructure inspection, cleaning, maintenance, and repair activities.

All Inspection and Maintenance Logs are kept in the Department of Public Works.

Form 8 – Community-wide Measures

Part IV.F.2.

<p>1. Herbicide Application Management Describe your program for preventing herbicides from being washed into the waters of the State and to prevent erosion caused by de-vegetation.</p>
<p>Herbicides are not used by the Borough of Barnegat Light for de-vegetation / weed management</p>
<p>2. Excess Deicing Material Management Describe your program for ensuring that excess salt piles are removed in a timely manner after storm events.</p>
<p>Barnegat Light Public Works shall inspect the roadways within 72 hours of a storm event and remove any excess piles of salt deicing material left by the trucks spreading the material.</p> <p>Barnegat Light adopted a Privately Owned Salt Storage Ordinance Code Chapter 114 section 114-11 on 9/11/2024. This ordinance is the same as the model ordinance provided by the NJDEP.</p>
<p>3. Roadside Vegetative Waste Describe your program for ensuring proper pickup, handling, storage, and disposal of wood waste and yard trimmings generated by the permittee along municipal roads or on municipal properties (trimming trees, mowing, etc.).</p>
<p>Barnegat Light Public Works picks-up wood waste and yard trimmings for disposal at the County landfill to ensure these materials are managed to minimize impacts to stormwater management facilities</p>
<p>4. Roadside Erosion Control Describe your program to detect and repair erosion along municipal roadways.</p>
<p>Barnegat Light Public Works performs visual inspection for roadside erosion during their daily operations and performs roadside stabilization, if required.</p> <p>All records are maintained at the Barnegat Light Public Works Dept.</p>

Form 9 – Municipal Maintenance Yards & Other Ancillary Operations

Part IV.F.5.

Please complete a separate Form 9 for each yard or site. Indicate the number of yards/sites the municipality owns or operates: 1

1. Site Name and Address	
Public Works Yard # 10 W. 10 th Street, Barnegat Light NJ	
2. Monthly Site Inspections Describe the nature of inspections conducted at this site and the location of inspection logs.	
Monthly inspections of the maintenance yard are performed including material storage and fuel tank. Inspection Logs are maintained at the SPC Office Public Works Yard # 10 W. 10 th Street, Barnegat Light NJ	
3. Inventory List List all materials and machinery that are potentially exposed to stormwater.	
Materials	Machinery/Equipment
Stone, Crushed Concrete, Brick, Fill Soil	Cars, Trucks, Loaders, Backhoe, Skid Steers
Steel, Misc. Metal	One Dual Walled Fuel Tank Containing Gasoline and Diesel Fuel
PVC Pipe	
Road Materials. Cardboard	

<p>4. Discharge of Stormwater from Secondary Containment Describe the process in place for discharging stormwater from secondary containment areas where outdoor containers are stored.</p>
<p>No secondary containment is located onsite.</p>
<p>5. Fueling Operations Does fueling occur on site? If so, describe the BMPs in place to minimize contamination of stormwater from fueling activities. If not, explain where fueling takes place.</p>
<p>This site contains a dual walled fuel tank for both gasoline and diesel fuel. Standard operating procedures to address vehicle fueling are established, maintained, and implemented. Safe operation of fueling equipment instruction is posted on site. Any equipment, tanks, pumps, piping and fuel dispensing equipment found to be leaking or in disrepair is immediately repaired or replaced. Logs are kept at the Public Works Department.</p>
<p>6. Vehicle/Equipment Maintenance and Repair Do you perform maintenance and repair on site? Is this conducted indoors or outdoors? If outdoors, describe the BMPs in place to minimize contamination of stormwater from maintenance and repair activities.</p>
<p>All Municipal vehicles are maintained indoors, and logs are kept at the Public Works Department.</p>
<p>7. Wash Wastewater Containment Do you wash vehicles on site? If so, describe the BMPs in place to minimize contamination of stormwater from these activities. Note that on site containment structures require annual inspections by a NJ licensed professional engineer. If not, explain where vehicle washing takes place.</p>
<p>Equipment and vehicles in need of washing are taken to a privately owned carwash or washed indoors where the wash wastewater is discharged to the public sanitary sewer system.</p>
<p>8. Salt and Other Granular De-icing Materials Do you store salt and other granular deicing materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p>No salting or de-icing is performed by the Borough.</p>

<p>9. Aggregate Material, Wood Chips, and Finished Leaf Compost Do you store these materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p>No aggregate material or Construction debris is stored outside or onsite.</p>
<p>10. Cold Patch Asphalt Do you store these materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p>No cold patch asphalt is stored outside or onsite.</p>
<p>11. Street Sweepings and Storm Sewer Cleanout Materials Do you store these materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p>Street sweepings and catch basin clean out materials are disposed of in accordance with N.J.A.C. 7:26-1.1. Any stored materials are located within a leak proof container or placed on a bermed impervious surface and removed within six months.</p>
<p>12. Construction and Demolition Waste, Wood Waste, and Yard Trimmings Do you store these materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p>No construction or demolition waste, wood waste or yard trimmings are stored onsite.</p>
<p>13. Scrap Tires Do you store these materials on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater from these materials. If not, explain where these materials are stored.</p>
<p>No scrap tires are stored outside or onsite. Scrap tires are brought to a private vehicle scrap yard for disposal.</p>
<p>14. Inoperable Vehicles and Equipment Do you store inoperable vehicles or equipment on site? If so, describe how they are stored and the BMPs in place to minimize contamination of stormwater. If not, explain where they are stored.</p>
<p>No inoperable vehicles or equipment is stored outside or onsite.</p>

Form 10 – Training

Part IV.F.6-10.

Stormwater Program Coordinators
Describe the training provided for the municipal Stormwater Program Coordinator.
<p>Stormwater Program Coordinator (SPC) must ensure appropriate staff receive training on topics in the chart below as required due to job duties assigned within three months of commencement of duties and again on the frequency below. Indicate the location of associated training sign in sheets, dates, and agendas or description for each topic.</p> <p>SPC must attend stormwater coordinator training within 36 months of commencement of duties.</p>

Topic	Municipal Employees Examples: in-person or virtual group sessions, e-Learning, field trainings, and videos
Describe the training provided for municipal staff.

Stormwater Management Design Reviewers
Describe the training provided for individuals responsible for reviews and approvals of stormwater management designs.
<p>All design engineers, municipal engineers, and others who review the stormwater management design for development and redevelopment projects on behalf of the municipality must attend the first available class upon assignment as a reviewer and every five years thereafter. The course is a free, two-day training conducted by DEP staff. Training dates and locations are posted at www.nj.gov/dep/stormwater/training.htm. Indicate the location of the DEP certificate of completion for each reviewer.</p> <p>The Borough's Planning/Zoning Board Engineer has completed the required training and maintains their NJDEP Certificate of Completion form. The training course is attended every five years.</p>

Municipal Board and Governing Body Members
Describe the training provided for members of the planning/zoning board and municipal council.
<p>Required for individuals who review and approve applications for development and redevelopment projects in the municipality. This includes members of the planning and zoning boards, town council, and anyone else who votes on such projects. Training is in the form of online videos, posted at www.nj.gov/dep/stormwater/training.htm.</p> <p>Within 6 months of commencing duties, watch Asking the Right Questions in Stormwater Review Training Tool. Once per term, thereafter, watch at least one of the online DEP videos in the series available under Post-Construction Stormwater Management. Indicate the location of records documenting the names, video titles, and dates completed for each board and governing body member.</p> <p>The training of elected and appointed individuals who review and approve applications for development and redevelopment projects in Barnegat Light Borough is ongoing.</p>

Training Records
Indicate the location of training records for the above required training.
All information is available within the Clerks or Planning/Zoning Board Offices.

Form 11 – MS4 Mapping

Part IV.G.1.

1. Provide a link to the most current MS4 outfall/infrastructure map.	
<p>MS4 Outfall/Infrastructure Map is Pending – Due January 1, 2026</p> <p>www.barnegatlight.org</p> <p>A dedicated stormwater webpage is in progress. A link will be provided once it has been established.</p>	
2. Indicate the total of each type of MS4 infrastructure listed below (due 01 Jan 2026).	
a. MS4 outfalls	22
b. MS4 ground water discharge points (basins or overland flow infiltration areas)	0
c. MS4 interconnections	0
d. MS4 storm drain inlets	47
e. MS4 manholes	<i>Location/Qnty Pending</i>
f. Length of conveyance (channels, pipes, ditches, etc.)	<i>Location/Qnty Pending</i>
g. MS4 pump stations	0
h. MS4 stormwater facilities (any that are not listed above)	0
i. Maintenance yard(s) and other ancillary operations	1
3. Describe how the municipality’s outfall/infrastructure map is reviewed and updated to reflect any new or newly identified MS4 infrastructure (e.g., an outfall is closed, a new basin is constructed, ownership of an outfall has changed, etc.).	
<p>The outfall/Infrastructure map will be updated annually in accordance with the Stormwater Coordinator’s maintenance logs and new stormwater infrastructure improvements performed by Barnegat Light.</p>	
4. Describe how the municipality will create and update its MS4 Infrastructure Map.	
<p>Barnegat Light will be working with the Borough Engineer to create and update the MS4 Infrastructure Map. Barnegat Light and/or the Borough’s Engineer will locate all MS4 infrastructure on the map using a combination of existing mapping and field location using GIS software and/or computer aided design/drafting software.</p>	

Form 12 – Watershed Improvement Plan

Part IV.H.

<p>1. Describe how your municipality is developing its Watershed Improvement Plan.</p> <p>Barnegat Light does not currently have a Watershed Improvement Plan in place which has been approved by the NJDEP in accordance with the Tier ‘A’ permit.</p> <p>Phase 1 is due EDPA + 36 months or 1/1/2026</p> <p>Phase 2 is due EDPA + 48 months or 1/1/2027</p> <p>Phase 3 is due EDPA + 60 months or 12/1/2027</p> <p>Barnegat Light will be coordinating with the Borough Engineer’s office to begin phase 1 in 2025.</p>
<p>2. Describe any regional projects or collaboration efforts with other municipalities.</p> <p>There are no current plans for Barnegat Light to collaborate with other municipalities for the Watershed Improvement Plan.</p>
<p>3. Indicate the location of records related to all public information sessions and meetings for discussions of the Watershed Improvement Plan.</p> <p>Barnegat Light doesn’t currently have a Watershed Improvement Plan in place. Once the plan has been completed and approved it will be made available to the public on the Borough’s dedicated stormwater management webpage.</p>
